

Excerpt of a Fully Dressed Use Case

Name: Buy Stocks over the Web

Primary Actor: Purchaser

Scope: Finance Package (PAF)

Level: User Goal

Stakeholders and Interests

- **Purchaser:** Wants to buy stocks and have them added to the portfolio.
- **Stock Agency:** Wants complete purchase information.

Preconditions

User is logged in.

Minimal Guarantee

Sufficient logging information exists so that the PAF can detect that something went wrong and can request the user to provide details.

Success Guarantee

The web site has acknowledged the purchase; the logs and the user's portfolio are updated.

Main Success Scenario

1. Purchaser selects to buy stocks over the web.
2. PAF obtains the name of the web site (A, B, ...) from the user.
3. PAF opens a web connection to the chosen site, retaining control.
4. Purchaser browses and buys stock from the web site.
5. PAF intercepts responses from the web site and updates the purchaser's portfolio.
6. PAF displays the new portfolio standing to the user.

Extensions

- 2a. Purchaser wants a web site that PAF does not support.
 - 2a1. System prompts for a new suggestion or allows cancellation.
- 4a. Web site does not immediately acknowledge the purchase but puts it on delay.
 - 4a1. PAF logs the delay and sets a timer to ask the purchaser about the outcome.

Special Requirements

- Touch screen user interface on a large flat-panel monitor; text must be visible from 1 meter.
- Credit authorization response within 30 seconds, 90% of the time.
- Robust recovery from failures in remote services such as inventory systems.
- Language internationalization for displayed text.
- Pluggable business rules insertable at steps 3 and 7.

Technology and Data Variations List

- *a. Manager override entered by swiping a card or entering a code via keyboard.
- 3a. Item identifier entered by barcode scanner or keyboard.
- 3b. Identifier may follow UPC, EAN, JAN, or SKU coding schemes.
- 7a. Credit account information entered by card reader or keyboard.
- 7b. Credit payment signature captured on paper receipt or digitally (expected in near future).

Frequency of Occurrence

Could be nearly continuous.

Open Issues

- Determine regional tax law variations.
- Explore mechanisms for remote service recovery.
- Identify necessary business customizations.
- Decide whether cashiers must remove their drawer when logging out.
- Clarify whether customers can use the card reader directly.

End of Use Case
